A MODERNIST MASTERPIECE

Reveal Designs Presents the Bainbridge Lever, designed by the world-renowned Cutler Anderson Architects.

(White Plains, NY June 12, 2009) The award-winning architectural design firm Cutler Anderson Architects has partnered with Reveal Designs to create a luxury line of hardware that celebrates sleek, modern style. The Bainbridge lever creates an elegant, world-class entrance that will leave a lasting first impression.

Each handle in the Bainbridge line is crafted from the finest materials with no detail left to chance. The innovative design features the handle wrapping around and through spindle, while the grip is designed to fit the hand perfectly and the wood handles are warm to the eye and to the touch. This collection is truly the epitome of modern design.

Celebrating mixed materials, the Bainbridge lever is available in Beech/Stainless Steel, Walnut/Stainless Steel, All Stainless Steel, Oil Rubbed Bronze/Stainless Steel or Anodized Aluminum/Stainless Steel. It functions with tubular latches, mortise and multipoint locks. Handcrafted in U.S.A., the Bainbridge lever measures 5-1/8" wide x 2-3/8" deep. Create an ethereal aesthetic with the Bainbridge from Reveal Designs, quite possibly the world's finest lever collection.

ABOUT CUTLER ANDERSON ARCHITECTS

Established in 1977, Cutler Anderson Architects is internationally known for its environmental awareness and attention to detail. The firm has won numerous awards and designed over 300 residential, commercial and cultural projects around the world. In addition to its architectural designs, Cutler Anderson Architects has designed a myriad of home products in conjunction with its architecture including hardware, furniture and lighting.
