***REVEAL DESIGNS EXPANDS DISTRIBUTION AND OPERATIONS
IN NORTH AMERICA AND EUROPE***

*Award-Winning, Architecturally-Designed Decorative Hardware Now
Available in Major Retail Markets*

White Plains, NY (November 11, 2008) -- Reveal Designs, a leading decorative hardware manufacturer, today announced the expansion of its operations into Canada and Europe - increasing its overall distribution network and creating growth opportunities in new markets. The entry into these new markets represents a strategic shift in the company's push globally.

Following several years of U.S. expansion that has increased its distribution network to more than 30 U.S. distributors, Reveal Designs has begun focusing on new markets that represent significant growth opportunities to introduce their award-winning, architecturally-designed decorative hardware. While contemporary hardware is more prevalent in markets outside the U.S., no manufacturer has focused solely on bringing designs from award-winning U.S. architects to the Canadian and European markets.

“Our U.S. expansion has been an important focus for Reveal Design during the past few years; however, our commitment to the Canadian and European marketplace is critical to the company's long-term growth and success,” said Scott Roskind, Principal, Reveal Designs. “Through our partnerships with leading U.S. architects and designers like James Cutler of Cutler Anderson Architects and Peter Bohlin of Bohlin Cywinski Jackson, we are poised to bring fresh, never seen before designs to architects and interior designers in these new markets.”

Reveal Designs has been building a larger presence in both regions and already has expanded its list of distribution partners. Reveal Designs' full line of hardware is currently in five locations throughout Canada - *ELTE Summerhill Decorative Hardware in Toronto, Cantu Hardware in Vancouver and Victoria, and The Art of Hardware in Edmonton and Calgary* - and one location in Europe - *Courtyard Accessories in Warwickshire, England*. The company is in discussions with several other leading distributors to further broaden their reach.

- more -

Reveal Designs has complimented its international growth by also expanding its breadth of product offerings. Initially bringing to market cutting edge contemporary levers, knobs and cabinet pull designs, the company has now expanded its line of architecturally designed hardware to include pocket door hardware, push and kick plates, switch and outlet covers, door knockers and door stops, as well as a greater assortment of levers, knobs and cabinet pulls.

“Our architectural partners are constantly bringing innovative and industry-leading designs to market and allowing us to provide our customers with new and unique product offerings,” said Scott Roskind. “We see the desire for these products translating well in these new markets.”

Reveal Designs is preparing to release additional lines of hardware by James Cutler (Cutler Anderson Architects) and Peter Bohlin (Bohlin Cywinski Jackson) in the coming months.
